Topics Discussed:

1. Project features
2. Software development models
3. Front-end frameworks (Tailwind and Bootstrap)
4. Database connection in Laravel
5. Yajra Datatables in Laravel
6. Best sources to learn Laravel

Decisions Made:

1. We discussed different features which might fit in our software besides its basic functionalities.
2. We decided that we will use the Agile project management methodology, as it focuses on technical excellence and good design, close cooperation between the developers, and is open to late changes in requirements.
3. We discussed about Tailwind and Bootstrap front-end frameworks
4. Kejdi Domi explained how a database connection is done using a sample website built in Laravel.
5. Kejdi Domi demonstrated an example using Yajra Datatables to display data.
6. We shared with each-other the best sources and documentations to learn Laravel.

Tasks Assigned:

1. I (Anila Hoxha), will write the meeting report for this week.
2. Everyone in the team will continue the online tutorials to practice Laravel.
3. A first design of the database model will be worked and submitted by the end of this week.
4. The first draft of the Software System Requirements Specification will be written before the next meeting.

5. Everyone in the team will complete their Personal Log Wiki page in the GitHub repository.

Time, Place, and Agenda for Next Meeting:
